

# ETI Thrust Area 1: Data Access and Collaboration

Jordan Stomps

February 5, 2020

## 0.1 Introduction

The purpose of this manual is to provide members, particularly those from university institutions, of the Consortium for Enabling Technologies Innovation (ETI) details for collaboration with national labs. Data that has been gathered with potential interest to ETI collaborators is introduced, and instructions for accessing that data are provided. Hopefully this will serve as a catalyst for university members, like graduate students and their PIs, to partner with ventures at national labs that can benefit from academic research.
